

WEBINAR SERIES

TOWARDS UNDERSTANDING REGIONAL OCEANS FISHERIES GOVERNANCE AND MANAGEMENT: A Focus On The Indian Ocean Region

The role of regional fisheries management organizations in sustainable marine fisheries.

The Australian National Centre for Ocean Resources and Security (ANCHORS) and South West Indian Ocean Tuna Forum (SWIOTUNA), are holding a series of informative webinars on Regional Marine Fisheries Governance and Management. The webinars focus on regional fisheries decision making and other important elements of fisheries. The management of tuna fisheries is overseen by Regional Fisheries Management Organizations (RFMOs) such as the Indian Ocean Tuna Commission. The IOTC play a crucial role in ensuring sustainable fisheries within the Indian Ocean.

Objectives:

The Webinars Series are aimed to increase an understanding on the process of regional marine fisheries decision-making and their implementation. The webinars explore on creating a clear understanding to various stakeholders on RFMOs and their role in sustainable fisheries management. RFMOs are fundamental to sustainable fisheries management; hence, it is crucial to understand how they operate and linked fisheries management practice.

Language:

The sessions will be held in English, with live translations available in French and Portuguese to ensure accessibility for a wider audience. Over several webinars, we will invite experts to discuss various RFMO-related issues.

When:

The inaugural webinar is scheduled for November 18, 2024, at 9:00 AM EAT. Participants can expect expert insights, engaging discussions, and opportunities for Question and Answers.
